
Power Amplifier Support Components

EVALUATION KIT

EK28 is an easy to use engineering platform for prototype evaluation. The PC board is also a good starting point for an application specific layout. Provided items include: PC board, ceramic bypass capacitors and transient voltage suppressors. The amplifier is sold separately. Common hardware such as screws, nuts and user's preference for I/O connectors are not provided.

SOCKET

MS06

Part number MS06 consists of 2 socket strips. These are mounted directly in a print circuit board. Use a spacer between the PCB and the heatsink to avoid short circuits.
